(Contd. of page 1)

# Product name: Bismuth(III) nitrate pentahydrate

Identification number(s): EC number: 233-791-8

## 4 First-aid measures

# Description of first aid measures

After inhalation Supply fresh air. If required, provide artificial respiration. Keep patient warm. Şeek immediate medical advice.

After skin contact After skin contact Immediately wash with water and soap and rinse thoroughly. Seek immediate medical advice. After eye contact Rinse opened eye for several minutes under running water. Then consult a doctor. After swallowing Seek medical treatment. Information for doctor Most important symptoms and effects, both acute and delayed

Information for doctor Most important symptoms and effects, both acute and delayed Causes skin irritation. Causes serious eye irritation. Indication of any immediate medical attention and special treatment needed No further relevant information available.

# 5 Fire-fighting measures

# Extinguishing media Suitable extinguishing agents Carbon dioxide, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam. For safety reasons unsuitable extinguishing agents Halocarbon extinguisher Special hazards arising from the substance or mixture This substance is an oxidizer and its heat of reaction with reducing agents or combustibles may cause ignition. If this product is involved in a fire, the following can be released: Nitrogen oxides (NOV)

Nitrogen oxides (NOx) Bismuth oxide Advice for firefighters Protective equipment: Wear self-contained respirator. Wear fully protective impervious suit.

# 6 Accidental release measures

**Personal precautions, protective equipment and emergency procedures** Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation **Environmental precautions:** Do not allow material to be rel<u>e</u>ased to the environment without proper governmental permits. Environmental precautions: Do not allow material to be released to the environment with Methods and material for containment and cleaning up: Ensure adequate ventilation. Prevention of secondary hazards: Acts as an oxidizing agent on organic materials such as wood, paper and fats Keep away from combustible material. Reference to other sections See Section 7 for information on safe handling See Section 8 for information on personal protection equipment. See Section 13 for disposal information. Protective Action Criteria for Chemicals PAC-1: 12 mg/m3 PAC-3: 800 mg/m3

# 7 Handling and storage

# Handling Precautions for safe handling Handle under dry protective gas. Keep container tightly sealed. Store in cool, dry place in tightly closed containers. Ensure good ventilation at the workplace. Information about protection against explosions and fires: Substance/product can reduce the ignition temperature of flammable substances. This substance is an oxidizer and its heat of reaction with reducing agents or combustibles may cause ignition. Conditions for safe storage, including any incompatibilities Do not store together with acids. Further information about storage conditions:

Store under dry inert gas. This product is hygroscopic. Keep container tightly sealed. Store in cool, dry conditions in well sealed containers. Protect from humidity and water. **Specific end use(s)** No further relevant information available.

# 8 Exposure controls/personal protection

Additional information about design of technical systems: Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute.

Control parameters Components with limit values that require monitoring at the workplace: The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace. Additional information: No data

Exposure controls Personal protective equipment		
Personal protective equipment General protective and hygienic meas	sures	
The usual precautionary measures for h Keep away from foodstuffs, beverages a Remove all soiled and contaminated clo	andling chemicals should be followed.	
Remove all soiled and contaminated clc	thing immediately.	
Wash hands before breaks and at the electron Avoid contact with the eyes and skin.	nd of work. working environment. spirator when high concentrations are present.	
Maintain an ergonomically appropriate v	vorking environment.	
Recommended filter device for short	pirator when high concentrations are present. term use:	
Use a respirator with type N95 (USA) or	term use: r PE (EN 143) cartridges as a backup to engineering controls. Risk assessment should be performed to de nly use equipment tested and approved under appropriate government standards.	termine if air-
Protection of hands:	lly use equipment tested and approved under appropriate government standards.	
Impervious gloves Check protective gloves prior to each us	se for their proper condition	
The selection of suitable gloves not only	$\gamma$ depends on the material, but also on quality. Quality will vary from manufacturer to manufacturer.	
Penetration time of alove material (in	minutes) Not determined	
Eye protection: Safety glasses with sid Body protection: Protective work clothi	le shields / NIOSH (US) or EN 166(EU)	
Body protection: Protective work ciolin	ing.	
9 Physical and chemical properties	<u>;                                    </u>	
Information on basic physical and ch	emical properties	
General Information Appearance:		
Form:	Crystalline	
Odor: Odor threshold:	Odorless Not determined.	
pH-value:	Not applicable.	
Change in condition		
Melting point/Melting range:	30 °C (86 °F) (dec) Not determined	
Boiling point/Boiling range: Sublimation temperature / start:	Not determined	
Flammability (solid, gaseous) Ignition temperature:	Contact with combustible material may cause fire. Not determined	
Decomposition temperature:	Not determined	
Auto igniting:	Not determined.	
Danger of explosion: Explosion limits:	Not determined.	
Lower: Upper:	Not determined Not determined	
	Not applicable.	
Vapor pressure: Density at 20 °C (68 °F): Relative density	2.83 g/cm³ (23.616 lbs/gal) Not determined.	
Vapor density	Not applicable.	
Evaporation rate Solubility in / Miscibility with	Not applicable.	
Water:	Decomposes	
Partition coefficient (n-octanol/water) Viscosity:		
dynamic: kinematic:	Not applicable. Not applicable.	
Other information	Not applicable. No further relevant information available.	
10 Stability and reactivity		
Reactivity May intensify fire; oxidizer. Chemical stability Stable under recomi	mended storage conditions	
Thermal decomposition / conditions t	to be avoided: Decomposition will not occur if used and stored according to specifications.	I
Descibility of bazardous reactions		I
Reacts with reducing agents Reacts with flammable substances	and the second	
Incompatible materials:	t information available.	I
Acids Flammable substances		I
Reducing agents		I
Organic materials Metal powders		I
Water/moisture		I
Hazardous decomposition products: Nitrogen oxides		1
Bismuth oxide		
11 Toxicological information		
Information on toxicological effects		
Acute toxicity: The Registry of Toxic E	iffects of Chemical Substances (RTECS) contains acute toxicity data for this substance.	
LD/LC50 values that are relevant for o Oral LD50 4042 mg/kg (rat)	lassification:	
Skin irritation or corrosion: Causes sk	kin irritation.	
Eye irritation or corrosion: Causes se Sensitization: No sensitizing effects kno	erious eye irritation.	
Germ cell mutagenicity: No effects kno	own.	
Carcinogenicity: No classification data	on carcinogenic properties of this material is available from the EPA, IARC, NTP, OSHA or ACGIH.	
Reproductive toxicity: No effects know	/n.	(Contd. on page 4)
