<div>(Contd. of page 3)</div> <p>Subacute to chronic toxicity: Pentane isomers have a mild narcotic effect. Symptoms typically include drowsiness, and respiratory irritation. Heavy exposure may cause unconsciousness and, in extreme cases, death. Pentane isomers are irritating to the skin and eyes on contact. If ingested the liquid can be aspirated into the lungs where it will cause a rapid fall in oxygen and can cause asphyxia, brain damage and death. Chronic skin exposure is likely to cause dermatitis. Additional toxicological information: To the best of our knowledge the acute and chronic toxicity of this substance is not fully known.</p>
