

Safety Data Sheet per OSHA HazCom 2012

Product name: (Chloromethyl)triphenylphosphonium iodide

Reviewed on 05/07/2009

	(Contd. of page 1)
Information for doctor Most important symptoms and effects, both acute and delayed No further relevant information available. Indication of any immediate medical attention and special treatment needed No further relevant information available.	(conta: or page r)
5 Fire-fighting measures Extinguishing media Suitable extinguishing agents Carbon dioxide, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam. Special hazards arising from the substance or mixture If this product is involved in a fire, the following can be released: Carbon monoxide and carbon dioxide Hydrogen chloride (HCI) Phosphorus oxides Hydrogen iodide (HI) Advice for firefighters Protective equipment: Wear self-contained respirator. Wear fully protective impervious suit.	
6 Accidental release measures Personal precautions, protective equipment and emergency procedures Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation Environmental precautions: Do not allow material to be released to the environment without proper governmental permits. Methods and material for containment and cleaning up: Ensure adequate ventilation. Prevention of secondary hazards: No special measures required. Reference to other sections See Section 7 for information on safe handling See Section 8 for information on personal protection equipment. See Section 13 for disposal information.	
7 Handling and storage Handling Precautions for safe handling Keep container tightly sealed. Store in cool, dry place in tightly closed containers. Ensure good ventilation at the workplace. Information about protection against explosions and fires: No information known. Conditions for safe storage, including any incompatibilities Storage Requirements to be met by storerooms and receptacles: No special requirements. Information about storage in one common storage facility: Store away from oxidizing agents. Store in the dark. Store away from water/moisture. Further information about storage conditions: This product is hygroscopic. Store under dry inert gas. Keep container tightly sealed. Store in cool, dry conditions in well sealed containers. Protect from humidity and water. Protect from humidity and water. Protect from humidity and water.	
 8 Exposure controls/personal protection Additional information about design of technical systems: Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Control parameters Components with limit values that require monitoring at the workplace: Not required. Additional information: No data Exposure controls Personal protective equipment General protective equipment General protective and hygienic measures The usual precautionary measures for handling chemicals should be followed. Keep away from foodstuffs, beverages and feed. Remove all solied and contaminated clothing immediately. Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin. Maintain an ergonomically appropriate working environment. Breathing equipment: Use suitable respirator when high concentrations are present. Protection of hands: Impervious gloves Check protective gloves prior to each use for their proper condition. The selection of suitable gloves not only depends on the material, but also on quality. Quality will vary from manufacturer to manufacturer. Penetration time of glove material (in minutes) Not determined Evelocetion: Safety glasses Body protection: Protective work clothing. 	
9 Physical and chemical properties Information on basic physical and chemical properties General Information Appearance: Form: Solid Color: White Odor: Not determined Odor threshold: Not determined. pH-value: Not applicable.	
	(Contd. on page 3) USA

Product name: (Chloromethyl)triphenylphosphonium iodide

Page 3/4 Printing date 11/24/2015 Reviewed on 05/07/2009

Product name: (Chloromethyl)triphe	nylphosphonium iodide
	(Contd. of page 2)
Change in condition Melting point/Melting range: Boiling point/Boiling range: Sublimation temperature / start:	210 °C (410 °F) (dec) Not determined Not determined
Flash point: Flammability (solid, gaseous) Ignition temperature: Decomposition temperature: Auto igniting:	Not applicable Not determined. Not determined Not determined Not determined.
Danger of explosion: Explosion limits:	Product does not present an explosion hazard.
Density:	Not determined Not adtermined Not applicable. Not determined
Vapor density Evaporation rate Solubility in / Miscibility with	Not determined. Not applicable. Not applicable.
Water: Partition coefficient (n-octanol/water): Viscosity: dynamic:	Not applicable.
kinematic: Other information	Not applicable. No further relevant information available.
10 Stability and reactivity Reactivity No information known. Chemical stability Stable under recomm Thermal decomposition / conditions to Possibility of hazardous reactions No Conditions to avoid No further relevant Incompatible materials: Oxidizing agents Water/moisture Light Hazardous decomposition products: Carbon monoxide and carbon dioxide Hydrogen chloride (HCl) Phosphorus oxides (e.g. P205)	
Reproductive toxicity: No effects known Specific target organ system toxicity - Aspiration hazard: No effects known. Subacute to chronic toxicity: Prolonged exposure to iodides may caus boils, redness, black and blue spots, hive Subacute to chronic toxicity: No effect Subacute to chronic toxicity: Organic phosphorus compounds exhibit a exhibiting substantial water reactivity will compounds are cholinesterase inhibitors. can be highly paralytic.	in irritation. ious eye irritation. wm. wm. on carcinogenic properties of this material is available from the EPA, IARC, NTP, OSHA or ACGIH. n. - repeated exposure: No effects known. - single exposure: May cause respiratory irritation. se skin rash, running nose, headache and irritation of the mucous membranes. In severe cases the skin may show pimples, es and blisters. Iodides are readily diffused across the placenta. is known. a wide range of toxicity. Most are skin and eye irritants with the more volatile also being respiratory irritants. Those I have stronger irritating properties and may be corrosive enough to cause severe burns. Some organic phosphorus . Symptoms associated with these include muscle twitching, convulsions, flaccid paralysis, coma, respiratory failure. They
12 Ecological information Toxicity Aquatic toxicity: No further relevant infor Persistence and degradability No furth Bioaccumulative potential No further re Mobility in soil No further relevant inform Additional ecological information: General notes: Do not allow material to be released to th	er relevant information available. elevant information available. mation available. ne environment without proper governmental permits. uantities to reach ground water, water course or sewage system.
13 Disposal considerations Waste treatment methods	r national regulations to ensure proper disposal.

Recommendation: Disposal must be made according to official regulations.

per OSHA HazCom 2012	Printing date 11/24/2015 Reviewed on 05/07/2009	
Product name: (Chloromethyl)triphenylphosphonium iodide		
Recommended cleansing agent: Water, if necessary with cleansing agents.	(Contd. of page 3)	
14 Transport information Not a hazardous material for transportation.		
UN-Number DOT, IMDG, IATA	None	
UN proper shipping name DOT, IMDG, IATA	None	
Transport hazard class(es) DOT, ADR, IMDG, IATA		
Class	None	
Packing group DOT, IMDG, IATA Environmental hazards:	None Not applicable.	
Special precautions for user	Not applicable.	
Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code	· ·	
Transport/Additional information:	Not dangerous according to the above specifications.	
DOT Marine Pollutant (DOT):	No	
Safety, health and environmental regulations/legislation specific for the substance or mixture GHS label elements The product is classified and labeled in accordance with 29 CFR 1910 (OSHA HCS) Hazard pictograms		
 16 Other information Employers should use this information only as a supplement to other information information to ensure proper use and protect the health and safety of employees conformance with this Material Safety Data Sheet, or in combination with any ot Department issuing SDS: Global Marketing Department Date of preparation / last revision 11/24/2015 / - Abbreviations and acronyms: RID: Reglement international concernant le transport des marchandises dangereuses par chemin de fer (I IATA-DGR: Dangerous Goods Regulations by the "International Air Transport Association" (IATA) ICAO-TI: Technical Instructions by the "International Civil Aviation Organization ICAO-TI: Technical Instructions by the "International Civil Aviation Organization" (ICAO) IMDG: International Maritime Code for Dangerous Goods DOT: US Department of Transport Association (AS: Chemical Abstracts Service (division of the American Chemical Society) HMIS: Hazardous Materials Information System (Canada) LC50: Lethal concentration, 50 percent LD50: Lethal concentration, 50 percent UVB: very Persistent and very Bioaccumulative ACGIH: American Conference of Governmental Industrial Hygienists (USA) OSHA: Occupational Safety and Health Administration (USA) INTP: National Toxicology Program (USA) INTP: National Agency for Research on Cancer EPA: Environmental Protection Agency (USA)
