## 1-Methylpyrazole-4-boronic acid pinacol ester

|  | evision date 01/13/2 |
|--|----------------------|
| roduct name: 1-Methylpyrazole-4-boronic acid pinacol ester   |                      |
| Seek immediate medical advice.<br>After skin contact<br>Immediately wash with water and soap and rinse thoroughly.<br>Seek immediate medical advice.<br>After eye contact Rinse opened eye for several minutes under running water. Then consult a doctor.<br>After swallowing Seek medical treatment.<br>Information for doctor<br>Most important symptoms and effects, both acute and delayed<br>Causes skin irritation.<br>Harmful if swallowed.<br>Causes serious eye irritation.<br>May cause respiratory irritation.<br>May cause respiratory irritation.<br>Indication of any immediate medical attention and special treatment needed No further relevant information available.   | (Contd. of pag       |
| 5 Fire-fighting measures<br>Extinguishing media<br>Suitable extinguishing agents Carbon dioxide, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant for<br>Special hazards arising from the substance or mixture<br>If this product is involved in a fire, the following can be released:<br>Carbon monoxide and carbon dioxide<br>Nitrogen oxides (NOx)<br>Boron oxide<br>Advice for firefighters<br>Protective equipment:<br>Wear self-contained respirator.<br>Wear fully protective impervious suit.  | oam.                 |
| 6 Accidental release measures<br>Personal precautions, protective equipment and emergency procedures<br>Wear protective equipment. Keep unprotected persons away.<br>Ensure adequate ventilation<br>Environmental precautions: Do not allow material to be released to the environment without proper governmental permits.<br>Methods and material for containment and cleaning up:<br>Dispose of contaminated material as waste according to section 13.<br>Ensure adequate ventilation.<br>Prevention of secondary hazards: No special measures required.<br>Reference to other sections<br>See Section 7 for information on safe handling<br>See Section 13 for disposal information.  |                      |
| 7 Handling and storage<br>Handling<br>Precautions for safe handling<br>Keep container tightly sealed.<br>Store in cool, dry place in tightly closed containers.<br>Ensure good ventilation at the workplace.<br>Information about protection against explosions and fires: No information known.<br>Conditions for safe storage, including any incompatibilities<br>Storage<br>Requirements to be met by storerooms and receptacles: No special requirements.<br>Information about storage in one common storage facility: Store away from oxidizing agents.<br>Further information about storage conditions:<br>Keep container tightly sealed.<br>Store in cool, dry conditions in well sealed containers.<br>Specific end use(s) No further relevant information available.  |                      |
| B Exposure controls/personal protection Additional information about design of technical systems: Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute Control parameters Components with limit values that require monitoring at the workplace: The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace. Additional information: No data Exposure controls Personal protective equipment General protective and hygienic measures The usual precautionary measures for handling chemicals should be followed. Keep away from foodstuffs, beverages and feed. Remove all solied and contaminated clothing immediately. Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin. Maintain an ergonomically appropriate working environment. Breathing equipment: Use suitable respirator when high concentrations are present. Recommended filter device for short term use: Use a respirator with type P100 (USA) or P3 (EN 143) cartridges as a backup to engineering controls. Risk assessment should be performed purfixing respirator with type P100 (USA) or P3 (EN 143) cartridges as a backup to engineering controls. Risk assessment should be performed purfixing respirator with type P100 (USA) or P3 (EN 143) cartridges as a backup to engineering controls. Risk assessment should be performed purfixing respirator with type P100 (USA) or P3 (EN 143) cartridges as a backup to engineering controls. Risk assessment should be performed purfixing respirator with type P100 (USA) or P3 (EN 143) cartridges as a backup to engineering controls. Risk assessment should be performed purfixing respirator with type P100 (USA) or P3 (EN 143) cartridges and and engineering controls. Risk assessment should be performed purfixing respirator with type P100 (USA) or P3 (EN 143) cartridges and and engineering controls. Risk assessment should be performed purfixing respirator with type P100 (USA) |                      |
| purifying respirators are appropriate. 'Only use equipment tested and approved under appropriate government standards.<br><b>Protection of hands:</b><br>Impervious gloves<br>Check protective gloves prior to each use for their proper condition.<br>The selection of suitable gloves not only depends on the material, but also on quality. Quality will vary from manufacturer to manufacturer.<br><b>Material of gloves</b> Nitrile rubber, NBR<br><b>Penetration time of glove material (in minutes)</b> 480<br><b>Glove thickness</b> 0.11 mm<br><b>Eye protection:</b> Safety glasses<br><b>Body protection:</b> Protective work clothing.   |                      |
