# 2. HAZARD(S) IDENTIFICATION

OSHA Haz Com: CFR 1910.1200:

Skin Corrosion/Irritation [Category 2] Eye Damage/Irritation [Category 2A]

Signal word:

Warning!

None

Hazard Statement(s):

Causes serious eye irritation Causes skin irritation

Pictogram(s) or Symbol(s):

**Precautionary Statement(s):** [Prevention] [Response]

> [Storage] [Disposal]

Wash hands and face thoroughly after handling. Wear protective gloves. Wear eye and face protection. If on skin: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention. None

Page 1 of 5

# 3. COMPOSITION/INFORMATION ON INGREDIENTS

| Substance/Mixture: | Substance             |
|--------------------|-----------------------|
| Components:        | 2,4-Dimethylquinoline |
| Percent:           | >98.0%(T)             |
| CAS Number:        | 1198-37-4             |
| Molecular Weight:  | 157.22                |
| Chemical Formula:  | C11H11N               |

# 4. FIRST-AID MEASURES

| Skin contact: is not breathing. Administer oxyg symptomatically and supportively take precautions to protect thems if skin irritation occurs get medica use. In case of contact with subsi-<br>Treat symptomatically and supportively and take precautions to protect thems involved and take precautions to purrey symptomatically and supportively and take precautions to purrey symptomatically and supportively and take precautions to purrey symptomatical precautions to purrey symptomatical instead.   Eye contact: IMMEDIATELY flush eyes with rumaterial may irritate or burn eyes remove any contact lenses. Keep exposure to substance may be do involved and take precautions to Do not induce vomiting with out in the container or label. Do not use respiration with the aid of a pock medical device. Loosen tight cloth in the recovery position so that vo and quiet. Treat symptomatically material(s) involved and take precautions to De not induce vomiting with out in the recovery position so that vo and quiet. Treat symptomatically material(s) involved and take precautions to protective symptomatically material(s) involved and take precautions to the voc and quiet. Treat symptomatically material(s) involved and take precautions to themselves.   Symptoms/effects: Redness.   Acute: Redness.   Delayed: No data available   Immediate medical attention: If breathing has stopped, perform injury. Ensure that medical perso themselves.   5. FIRE-FIGHTING MEASURES Suitable extinguishing media: Dry chemical, CO <sub>2</sub> , sand, earth, attempting large scale fire fighting   Specific hazards arising from the chemical Hazardous combustion products: These prod  |   |
|--|---|
| Skin contact: If skin irritation occurs get medical use. In case of contact with subsidiation of the special precautions to involved and take precautions to ono involved and take precautions to ono involved and take precautions to ono the container or label. Do not use grespiration with the aid of a pocker medical device. Loosen tight clott in the recovery position so that we and quiet. Treat symptomatically material(s) involved and take precautions to and quiet. Treat symptomatically material(s) involved and take preceding the clotter of the specific hazards arising from the chemical Hazardous combustion products:   Specific hazards arising from the chemical Hazardous combustion products: Dry chemical, CO <sub>2</sub> , sand, earth, attempting large scale fire fighting Specific hazards:   Special precautions for fire-fighters: Use water spray or fog; do not use straight streams. Dike fire-control water for 1 heated. Move containers from fire area if you can do it without risk.   Special precautions for fire-fighters: Wear positive pressure self-contained breathing apparatus (SCBA). Structural of the specific hazards self or fire-fighters:   | ou feel unwell. Move victim to fresh air. Give artificial respiration if victim<br>en if breathing is difficult. Keep victim warm and quiet. Treat<br>. Ensure that medical personnel are aware of the material(s) involved and   |
| Eye contact: IMMEDIATELY flush eyes with rumaterial may irritate or burn eyes remove any contact lenses. Keep exposure to substance may be dinvolved and take precautions to Do not induce vomiting with out in the container or label. Do not use serespiration with the aid of a pock medical device. Loosen tight clott in the recovery position so that vo and quiet. Treat symptomatically material(s) involved and take precautions to Do not uses.   Symptoms/effects: Redness.   Acute: Redness.   Delayed: No data available   Immediate medical attention: If breathing has stopped, perform injury. Ensure that medical perso themselves.   5. FIRE-FIGHTING MEASURES Dry chemical, CO2, sand, earth, attempting large scale fire fighting   Specific hazards arising from the chemical Hazardous combustion products:   Other specific hazards: These products include: Carbon or Closed containers may explode fire area if you can do it without risk.   Special precautions for fire-fighters: Wear positive pressure self-contained breathing apaparatus (SCBA). Structural for fire-fighters:   | I advice/attention. Remove and wash contaminated clothing before re-<br>ance, immediately flush skin with running water for at least 20 minutes.<br>rtively. Ensure that medical personnel are aware of the material(s)   |
| Ingestion: Do not induce vomiting with out in the container or label. Do not use respiration with the aid of a pocke medical device. Loosen tight cloth in the recovery position so that vo and quiet. Treat symptomatically material(s) involved and take pressing symptoms/effects:   Acute: Redness.   Delayed: No data available   Immediate medical attention: If breathing has stopped, perform injury. Ensure that medical perso themselves.   5. FIRE-FIGHTING MEASURES Dry chemical, CO <sub>2</sub> , sand, earth, wattempting large scale fire fighting   Specific hazards arising from the chemical Hazardous combustion products: These products include: Carbon of Closed containers may explode field.   Special precautions for fire-fighters: Use water spray or fog; do not use straight streams. Dike fire-control water for I heated. Move containers from fire area if you can do it without risk.   Special protective equipment for fire-fighters: Wear positive pressure self-contained breathing apparatus (SCBA). Structural filters:  | nning water for at least 15 minutes, keeping eyelids open. Contact with<br>Call emergency medical service. Move victim to fresh air. Check for and<br>victim warm and quiet. Treat symptomatically and supportively. Effects o<br>elayed. Ensure that medical personnel are aware of the material(s)  |
| Acute:<br>Delayed: Redness.<br>No data available   Immediate medical attention: If breathing has stopped, perform<br>injury. Ensure that medical perso<br>themselves.   5. FIRE-FIGHTING MEASURES   Suitable extinguishing media: Dry chemical, CO <sub>2</sub> , sand, earth, v<br>attempting large scale fire fighting   Specific hazards arising from the chemical<br>Hazardous combustion products: These products include: Carbon of<br>Closed containers may explode fi   Special precautions for fire-fighters: Use water spray or fog; do not use straight streams. Dike fire-control water for I<br>heated. Move containers from fire area if you can do it without risk.   Special protective equipment for fire-fighters: Wear positive pressure self-contained breathing apparatus (SCBA). Structural fighters:  | nedical advice. If swallowed, seek medical advice immediately and show<br>mouth-to-mouth method if victim ingested the substance; give artificial<br>at mask equipped with a one-way valve or other proper respiratory<br>hing such as a collar, tie, belt or waistband. If a person vomits place them<br>prit will not reenter the mouth and throat. Rinse mouth. Keep victim warm<br>and supportively. Ensure that medical personnel are aware of the |
| Delayed: No data available   Immediate medical attention: If breathing has stopped, perform injury. Ensure that medical perso themselves.   5. FIRE-FIGHTING MEASURES Suitable extinguishing media:   Suitable extinguishing media: Dry chemical, CO <sub>2</sub> , sand, earth, attempting large scale fire fighting   Specific hazards arising from the chemical These products include: Carbon of Closed containers may explode field on the specific hazards:   Special precautions for fire-fighters: Use water spray or fog; do not use straight streams. Dike fire-control water for I heated. Move containers from fire area if you can do it without risk.   Special protective equipment for fire-fighters: Wear positive pressure self-contained breathing apparatus (SCBA). Structural fighters:   |   |

| provide little or no thermal protection.   |   |
| 6. ACCIDENTAL RELEASE MEASURES   |   |

| Personal precautions:          | Avoid contact with skin, eyes, and clothing. Keep people away from and upwind of spill/leak. Do not touch<br>damaged containers or spilled material unless wearing appropriate protective clothing (Section 8). Warn<br>unnecessary personnel to move away. Stop leak if you can do it without risk. Ensure adequate ventilation.<br>Isolate the hazard area and deny entry to unnecessary and unprotected personnel. |
|--------------------------------|---|
| Personal protective equipment: | Wear eye protection (splash goggles) and face protection (full length face shield). Lab coat. Vapor<br>respirator. Be sure to use a MSHA/NIOSH approved respirator or equivalent. Wear protective gloves<br>(nitrile).  |
| Emergency procedures:          | In case of a spill and/or a leak, always shut off any sources of ignition, ventilate the area, and excercise caution. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Warn personnel to move away. Prevent entry into sewers, basements or confined areas; dike if needed.  |

#### Methods and materials for containment and cleaning up:

ELIMINATE all ignition sources (no smoking, flares, sparks, or flames in immediate area). Stop leak if without risk. Ventilate the area. Absorb with an inert material and put the spilled material in an appropriate waste disposal container. Use clean non-sparking tools to collect absorbed material. Environmental precautions: Prevent further leakage or spillage if safe to do so. Water runoff can cause environmental damage. Prevent entry into sewers, basements or confined

areas; dike if needed.

| Precautions for safe handling: | Do NOT breath gas, fumes, vapor, or spray. Avoid contact with skin and eyes. Good general ventilation should be sufficient to control airborne levels. Keep container dry. Handle and open container with care.                       |
|--------------------------------|---|
|                                | Wear suitable protective clothing, gloves and eye/face protection. When using do not eat, drink, or smoke<br>Keep away from sources of ignition.  |
| Conditions for safe storage:   | Keep only in the original container in a cool well-ventilated place. Keep away from incompatibles.<br>Containers which are opened must be carefully resealed and kept upright to prevent leakage. Avoid<br>prolonged storage periods. |
| Storage incompatibilities:     | Combustible substances, Store away from oxidizing agents  |

### 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure limits: No data available

# Appropriate engineering controls:

Good general ventilation should be sufficient to control airborne levels. Ventilation is normally required when handling or using this product. Eyewash fountains should be provided in areas where there is any possibility that workers could be exposed to the substance. Follow safe industrial engineering/laboratory practices when handling any chemical.

| Personal protective equipment |   |
|-------------------------------|---|
| Respiratory protection:       | Vapor respirator. Be sure to use a MSHA/NIOSH approved respirator or equivalent.    |
| Hand protection:              | Nitrile gloves.   |
| Eye protection:               | Wear eye protection (splash goggles) and face protection (full length face shield). |
| Skin and body protection:     | Lab coat.   |

#### Revision date: 08/15/2016

Revision number: 3

TCI chemicals are for research purposes only and are NOT intended for use as drugs, food additives, households, or pesticides. The information herein is believed to be correct, but does not claim to be all inclusive and should be used only as a guide. Neither the above named supplier nor any of its affiliates or subsidiaries assumes any liability whatsoever for the accuracy or completeness of the information contained herein. Final determination of suitability of any material is the sole responsibility of the user. All chemical reagents must be handled with the recognition that their chemical, physiological, toxicological, and hazardous properties have not been fully investigated or determined. All chemical reagents should be handled only by individuals who are familiar with their potential hazards and who have been fully trained in proper safety, laboratory, and chemical handling procedures. Although certain hazards are described herein, we can not guarantee that these are the only hazards which exist. Our SDS are based only on data available at the time of shipping and are subject to change without notice as new information is obtained. Avoid long storage periods since the product is subject to degradation with age and may become more dangerous or hazardous. It is the responsibility of the user to request updated SDS for products that are stored for extended periods. Disposal of unused product must be undertaken by qualified personnel who are knowledgeable in all applicable regulations and follow all pertinent safety precautions including the use of appropriate protective equipment (e.g. protective goggles, protective clothing, breathing equipment, face mask, fume hood). For proper handling and disposal, always comply with federal, state and local regulations.
