

Revision number: 2 Revision date: 10/06/2014

1. IDENTIFICATION

Product	name:
Product	code:

trans-Anethole P0494

Product use: Restrictions on use: For laboratory research purposes. Not for drug or household use.

Company:	Emergency telephone number:
TCI America	Chemical Emergencies:

2. HAZARD(S) IDENTIFICATION

OSHA Haz Com: CFR 1910.1200:	Flammable Liquids [Category 4]
Signal word:	Warning!
Hazard Statement(s):	Combustible liquid
Pictogram(s) or Symbol(s):	None
Precautionary Statement(s): [Prevention] [Response] [Storage] [Disposal]	Keep away from heat, sparks, open flames or other hot surfaces No smoking. Wear protective gloves, eye protection and face protection. In case of fire: Use dry chemical, CO2, water spray or alcohol-resistant foam to extinguish. Store in well-ventilated place. Keep cool. Dispose of contents and container in accordance with US EPA guidelines for the classification and determination of hazardous waste listed in 40 CFR 261.3. (See Section 13)

TCI AMERICA

SAFETY DATA SHEET

Hazards not otherwise classified: [HNOC] May be harmful if swallowed.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance/Mixture: Components:	Substance trans-Anethole
Percent:	>98.0%(GC)
CAS Number:	4180-23-8
Molecular Weight:	148.21
Chemical Formula:	C ₁₀ H ₁₂ O
Synonyms:	trans-p-Methoxypropenylbenzene , trans-p-Propenylanisole

4. FIRST-AID MEASURES

Inhalation:

Call emergency medical service. Move victim to fresh air. Give artificial respiration if victim is not breathing. Administer oxygen if breathing is difficult. Keep victim warm and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves.

4. FIRST-AID MEASURES	
Skin contact:	Call a poison center or doctor if you feel unwell. In case of contact with substance, immediately flush skin with running water for at least 20 minutes. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves.
Eye contact:	In case of contact with substance, immediately flush eyes with running water for at least 20 minutes. If eye irritation persists get medical advice/attention. Move victim to fresh air. Check for and remove any contact lenses. Keep victim warm and quiet. Treat symptomatically and supportively. Effects of exposure to substance may be delayed. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves.
Ingestion:	If swallowed, seek medical advice immediately and show the container or label. Loosen tight clothing such as a collar, tie, belt or waistband. If a person vomits place them in the recovery position so that vomit will not reenter the mouth and throat. Rinse mouth. Keep victim warm and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves.
Symptoms/effects:	
Acute: Delayed:	No data available No data available
Immediate medical attention:	If breathing has stopped, perform artificial respiration. Use first aid treatment according to the nature of the injury. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves.
5. FIRE-FIGHTING MEASURES	
Suitable extinguishing media:	Dry chemical, CO ₂ , water spray, or alcohol-resistant foam. Consult with local fire authorities before attempting large scale fire fighting operations.
Specific hazards arising from the che	nical
Hazardous combustion products: Other specific hazards:	These products include: Carbon oxides Closed containers may explode from heat of a fire.
Special precautions for fire-fighters:	v low flash point. Use of water sprav when fighting fire may be inefficient. Use water sprav or fog: do not use

CAUTION: All these products have a very low flash point: Use of water spray when fighting fire may be inefficient. Use water spray or fog; do not use straight streams. Do not use straight streams. Runoff to sewer may create fire or explosion hazard. Containers may explode when heated. Move containers from fire area if you can do it without risk.

Special protective equipment for fire-fighters:

Wear positive pressure self-contained breathing apparatus (SCBA). Structural fire fighters' protective clothing provides limited protection in fire situations ONLY; it may not be effective in spill situations. Wear chemical protective clothing which is specifically recommended by the manufacturer. It may provide little or no thermal protection.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions:	Use spark-proof tools and explosion-proof equipment. Remove all sources of ignition. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing (Section 8). Warn unnecessary personnel to move away. Stop leak if you can do it without risk. Ensure adequate ventilation. Isolate the hazard area and deny entry to unnecessary and unprotected personnel.
Personal protective equipment:	Splash goggles. Lab coat. Vapor respirator. Be sure to use a MSHA/NIOSH approved respirator or equivalent. Wear protective gloves (nitrile).
Emergency procedures:	Isolate area until gas has dispersed. In case of a spill and/or a leak, always shut off any sources of ignition, ventilate the area, and excercise caution. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Warn personnel to move away. Prevent entry into sewers, basements or confined areas; dike if needed.

Methods and materials for containment and cleaning up:

ELIMINATE all ignition sources (no smoking, flares, sparks, or flames in immediate area). All equipment used when handling the product must be grounded. Stop leak if without risk. Ventilate the area. Absorb with an inert material and put the spilled material in an appropriate waste disposal container. Use clean non-sparking tools to collect absorbed material.

Environmental precautions:

Prevent further leakage or spillage if safe to do so. Water runoff can cause environmental damage. Prevent entry into sewers, basements or confined areas; dike if needed.

7. HANDLING AND STORAGE

Precautions for safe handling: Do NOT breath gas, fumes, vapor, or spray. Avoid contact with skin and eyes. Keep away from heat and sources of ignition. Use explosion-proof equipment. Use only non-sparking hand tool when handling this product. Ground all equipment containing material. Take measures to prevent build up of electrostatic charge. Good general ventilation should be sufficient to control airborne levels. Keep container dry. Handle and open container with care. Wear suitable protective clothing, gloves and eye/face protection. When using do not eat, drink, or smoke. Keep away from sources of ignition.

7. HANDLING AND STORAG			
Conditions for safe storage:	Store and use away from	heat, sparks, open flame, or any of s which are opened must be careful	lace. Keep away from sources of ignition. ther ignition source. Keep away from Ily resealed and kept upright to prevent
Storage incompatibilities:		, Store away from oxidizing agents	
8. EXPOSURE CONTROLS /	PERSONAL PROTECTION		
Exposure limits:	No data available		
	e sufficient to control airborne levels. eas where there is any possibility tha		en handling or using this product. Eyewash substance. Follow safe industrial
Personal protective equipment			
Respiratory protection: Hand protection: Eye protection: Skin and body protection:	Vapor respirator. Be sure Wear protective gloves. Splash goggles. Lab coat.	e to use a MSHA/NIOSH approved r	espirator or equivalent.
9. PHYSICAL AND CHEMICA	L PROPERTIES		
	Liquid		
Physical state (20°C): Form:	Liquid Clear		
Color:	Colorless - Very pale yell	ow	
Odor:	No data available		
Odor threshold:	No data available		
Melting point/freezing point:	20°C (Freezing point) (68°F)	pH:	No data available
Boiling point/range:	235°C (455°F)	Vapor pressure:	No data available
Decomposition temperature:	No data available	Vapor density:	No data available
Relative density:	0.99	Dynamic Viscosity:	No data available
Kinematic Viscosity:	No data available		
Partition coefficient: n-octanol/water (log Pow)	No data available	Evaporation rate: (Butyl Acetate = 1)	No data available
Flash point: Flammability (solid, gas):	92°C (198°F) No data available	Autoignition temperature: Flammability or explosive lin Lower: No data	No data available mits: a available
		Upper: No data	a available
Solubility(ies): Water: Insoluble Miscible: Ether, Chlore Soluble: Benzene, Ace			
10. STABILITY AND REACTI	VITY		
Reactivity: Chemical Stability: Possibility of Hazardous Reactio Conditions to avoid: Incompatible materials: Hazardous Decomposition Prod	Exposure to light. Exposure to moisture. Moisture sensitive. Oxidizing agents		
11. TOXICOLOGICAL INFOR			
RTECS Number: BZ9275000			

trans-Anethole	TCI AMERICA	Page 4 of 5	
Acute Toxicity: orl-mus LD50:3050 mg/kg	orl-rat LD50:2090 mg/kg		
Skin corrosion/irritation: No data available			
Serious eye damage/irritation: No data available			
Respiratory or skin sensitization: No data available			
Germ cell mutagenicity: mmo-sat 10 umol/plate (-S9)	mmo-sat 200 ng/plate	ş (+S9)	
msc-mus-lym 24 mg/L			
Carcinogenicity:			
No data available			
IARC: No data available	NTP: No data available	OSHA: No data available	
Reproductive toxicity: orl-rat TDLo: 800 mg/kg(1-10D preg)			
Routes of Exposure: Symptoms related to exposure: Overexposure may result in serious illness Potential Health Effects: May be harmful if inhaled or ingested. Ove Target organ(s):	Inhalation, Eye contact, Ingestion. s or death. rexposure may result in serious illness or death. No data available		
12. ECOLOGICAL INFORMATION			
Ecotoxicity Fish: Crustacea: Algae:	No data available No data available No data available		
Persistence and degradability: Bioaccumulative potential (BCF): Mobility in soil: Partition coefficient: n-octanol/water (log Pow) Soil adsorption (Koc): Henry's Law: constant (PaM ³ /mol)	No data available No data available No data available No data available No data available No data available		
13. DISPOSAL CONSIDERATIONS Disposal of product:	Recycle to process if possible. It is the generator's re	esponsibility to comply with Federal. State and Local	
	rules and regulations. You may be able to dissolve o chemical incinerator equipped with an afterburner an assistance but does not replace these laws, nor does regulatory compliance according to the law. US EPA	or mix material with a combustible solvent and burn in a and scrubber system. This section is intended to provide	
Disposal of container:	Dispose of as unused product. Do not re-use empty		
Other considerations:	Observe all federal, state and local regulations when	n disposing of the substance.

TCI chemicals are for research purposes only and are NOT intended for use as drugs, food additives, households, or pesticides. The information herein is believed to be correct, but does not claim to be all inclusive and should be used only as a guide. Neither the above named supplier nor any of its affiliates or subsidiaries assumes any liability whatsoever for the accuracy or completeness of the information contained herein. Final determination of suitability of any material is the sole responsibility of the user. All chemical reagents must be handled with the recognition that their chemical, physiological, toxicological, and hazardous properties have not been fully investigated or determined. All chemical reagents should be handled only by individuals who are familiar with their potential hazards and who have been fully trained in proper safety, laboratory, and chemical handling procedures. Although certain hazards are described herein, we can not guarantee that these are the only hazards which exist. Our SDS are based only on data available at the time of shipping and are subject to change without notice as new information is obtained. Avoid long storage periods since the product is subject to degradation with age and may become more dangerous or hazardous. It is the responsibility of the user to request updated SDS for products that are stored for extended periods. Disposal of unused product must be undertaken by qualified personnel who are knowledgeable in all applicable regulations and follow all pertinent safety precautions including the use of appropriate protective equipment (e.g. protective goggles, protective clothing, breathing equipment, face mask, fume hood). For proper handling and disposal, always comply with federal, state and local regulations.
