

Revision number: 2 Revision date: 10/06/2014

1. IDENTIFICATION

Product name: Product code: p-Tolylacetic Acid T0882

Product use: Restrictions on use:

Company:

CI America 9211 N. Harborgate Street Portland, OR 97203 U.S.A. Telephone: +1-800-423-8616 / +1-503-283-1681 Fax: +1-888-520-1075 / +1-503-283-1987 e-mail: sales-US@TCIchemicals.com www.TCIchemicals.com

2. HAZARD(S) IDENTIFICATION

OSHA Haz Com: CFR 1910.1200:

Skin Corrosion/Irritation [Category 2] Eye Damage/Irritation [Category 2A]

Signal word:

Hazard Statement(s):

Causes serious eye irritation Causes skin irritation

Pictogram(s) or Symbol(s):

Precautionary Statement(s): [Prevention] [Response]

> [Storage] [Disposal]

Wash hands and face thoroughly after handling. Wear protective gloves. Wear eye and face protection. If on skin: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention. None

Chemical Formula:
Synonyms:

Substance p-Tolylacetic Acid >98.0%(GC)(T) 622-47-9 150.18 C₉H₁₀O₂ 4-Methylphenylacetic Acid

Warning!

None

Skin contact:is not breathing. Administer oxygen if breathing is difficult. Keep victim warm and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved take precautions to protect themselves.Skin contact:If skin irritation occurs get medical advice/attention. Remove and wash contaminated clothing before re use. In case of contact with substance, immediately flush skin with running water for at least 20 minuter Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves.Eye contact:IMMEDIATELY flush eyes with running water for at least 15 minutes, keeping eyelids open. Contact with material may irritate or burn eyes. Call emergency medical service. Move victim to fresh air. Check for remove any contact lenses. Keep victim warm and quiet. Treat symptomatically and supportively. Effec exposure to substance may be delayed. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves.Ingestion:Do not induce vomiting with out medical advice. If swallowed, seek medical advice immediately and sh the container or label. Do not use mouth-to-mouth method if victim ingested the substance; give artificia to a pocket mask equipped with a one-way valve or other proper respiration waterial(s) involved and take precautions to protect themselves.Symptoms/effects:Redness. No data availableMemodiate medical attention:If breathing has stopped, perform artificial respiration. Use first aid treatment according to the nature of		
Skin contact: If skin irritation occurs get medical advice/attention, Remove and wash contaminated clothing before rates it 20 minutes. In case of contact with substance, immediately flush skin with running water for at least 20 minutes. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Eye contact: IMMEDIATELY flush eyes with running water for at least 20. Move vicitin to fresh air. Check for remove any contact lenses. Keep vicitim warm and guide. Treat symptomatically and supportively. Effect exposure to substance may be delayed. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Ingestion: Do not induce vomiting with out medical advice. If swallowed, seek medical advice immediately and ship by artificia respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Lossen tight ichtoing such as a collar, tie, bell or waistband. If a person vomits place th in the recovery position so that vomit will not reenter the muthat alterial person vomits place th in the recovery position so that vomit will not reenter the muthat alterial person vomits place th in the recovery position so that vomit will not reenter the muthat alterial person vomits place th material(s) involved and take precautions to protect themselves. Symptoms/effects: Redness. Acute: Redness. Dalayed: No data available Immediate medical attention: If breathing has stopped, perform artificial respiration. Use first aid treatment according to the naterinal (s) involved and take precautions to protect them	Inhalation:	symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and
Eye contact: IMMEDIATELY fluish eyes with running water for at least 15 minutes, keeping eyelids open. Contact with material may itriate or burn eyes. Call emergency medical service. Move vicin to fresh air. Check for remove any contact lenses. Keep vicitm warm and quiet. Treat symptomatically and supportively. Effect exposure to substance may be delayed. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Ingestion: Do not induce vomiting with out medical advice. If swallowed, seek medical advice immediately and sh the container or label. Do not nouse mouth-hormouth method if vicitm ingested the substance give artificit respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Is swallowed, seek medical advice immediately and sh the container or label. Do not use mouth-hormouth method if vicitm ingested the substance give artificit respiration with the aid of a pocket mask equipped with respirator the material(s) involved and take precautions to protect themselves. Symptoms/effects: Acute: No data available Mediate medical attention: If breathing has stopped, perform artificial respiration. Use first aid treatment according to the nature of injury. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Specific hazards arising from the chemical Advices. Dry chemical, CO2, sand, earth, water spray or regular foam Consult with local fire authorities before attempting large scale fire fighting operations. Specific hazards arising from the chemical Advices. These products: include: Carbon oxides Closed contai	Skin contact:	If skin irritation occurs get medical advice/attention. Remove and wash contaminated clothing before re- use. In case of contact with substance, immediately flush skin with running water for at least 20 minutes. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s)
Ingestion: Do not induce vomiting with out medical advice. Is wallowed, seek medical advice immediately and share or label. Do not use mouth to-mouth method if victim ingested the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Loosen tight clothing such as a collar, tie, belt or walstband. If a person vomits place the in the recovery position so that vomit will not reenter the mouth and throat. Rinse mouth. Keep victim w and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Symptoms/effects: Redness. Acute: Redness. Delayed: No data available Immediate medical attention: If breathing has stopped, perform artificial respiration. Use first aid treatment according to the nature of injury. Ensure that medical personnel are aware of the material(s) involved and take precautions to prothemselves. 5. FIRE-FIGHTING MEASURES Dry chemical, CO ₂ , sand, earth, water spray or regular foam Consult with local fire authorities before attempting large scale fire fighting operations. Specific hazards arising from the chemical fazardous combustion products: These products include: Carbon oxides Closed containers may explode from heat of a fire. Closed containers may explode wheat of a fire. Specific hazards: These products include: Carbon oxides Closed containers from fire areal tyou can do it without risk. Special precautions for	Eye contact:	IMMEDIATELY flush eyes with running water for at least 15 minutes, keeping eyelids open. Contact with material may irritate or burn eyes. Call emergency medical service. Move victim to fresh air. Check for and remove any contact lenses. Keep victim warm and quiet. Treat symptomatically and supportively. Effects of exposure to substance may be delayed. Ensure that medical personnel are aware of the material(s)
Acute: Redness. Delayed: No data available mmediate medical attention: If breathing has stopped, perform artificial respiration. Use first aid treatment according to the nature of injury. Ensure that medical personnel are aware of the material(s) involved and take precautions to pro themselves. 5. FIRE-FIGHTING MEASURES Suitable extinguishing media: Dry chemical, CO ₂ , sand, earth, water spray or regular foam Consult with local fire authorities before attempting large scale fire fighting operations. Specific hazards arising from the chemical lazardous combustion products: These products include: Carbon oxides Other specific hazards: Closed containers may explode from heat of a fire. Special precautions for fire-fighters: Jse water spray or fog; do not use straight streams. Dike fire-control water for later disposal; do not scatter the material. Containers may explode wheated. Move containers from fire area if you can do it without risk. Special protective equipment for fire-fighters: Wear positive pressure self-contained breathing apparatus (SCBA). Structural fire fighters' protective clothing provides limited protection in fire situations. Wear chemical protective clothing which is specifically recommended by the manufacturer. It may rovide little or no thermal protection.	Ingestion:	Do not induce vomiting with out medical advice. If swallowed, seek medical advice immediately and show the container or label. Do not use mouth-to-mouth method if victim ingested the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Loosen tight clothing such as a collar, tie, belt or waistband. If a person vomits place them in the recovery position so that vomit will not reenter the mouth and throat. Rinse mouth. Keep victim warn and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware of the
Delayed: No data available Inmediate medical attention: If breathing has stopped, perform artificial respiration. Use first aid treatment according to the nature of injury. Ensure that medical personnel are aware of the material(s) involved and take precautions to pro themselves. 5. FIRE-FIGHTING MEASURES Dry chemical, CO ₂ , sand, earth, water spray or regular foam Consult with local fire authorities before attempting large scale fire fighting operations. Specific hazards arising from the chemical lazardous combustion products: These products include: Carbon oxides Closed containers may explode from heat of a fire. Special precautions for fire-fighters: Ise water spray or fog; do not use straight streams. Dike fire-control water for later disposal; do not scatter the material. Containers may explode wheated. Move containers from fire area if you can do it without risk. Special protective pressure self-contained breathing apparatus (SCBA). Structural fire fighters' protective clothing provides limited protection in fire situations. Wear chemical protective clothing which is specifically recommended by the manufacturer. It may rovide little or no thermal protection.	ymptoms/effects:	
injury. Ensure that medical personnel are aware of the material(s) involved and take precautions to pro themselves.

Wear chemical protective clothing which is specifically recommended by the manufacturer. It may provide little or no thermal protection.	Jse water spray or fog; do not use straig neated. Move containers from fire area if	you can do it without risk.
6. ACCIDENTAL RELEASE MEASURES	Vear positive pressure self-contained br DNLY; it may not be effective in spill situ	eathing apparatus (SCBA). Structural fire fighters' protective clothing provides limited protection in fire situations
	3. ACCIDENTAL RELEASE MEAS	URES

Personal precautions:	Avoid contact with skin, eyes, and clothing. Keep people away from and upwind of spill/leak. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing (Section 8). Warn unnecessary personnel to move away. Stop leak if you can do it without risk. Ensure adequate ventilation. Isolate the hazard area and deny entry to unnecessary and unprotected personnel.
Personal protective equipment:	Wear eye protection (splash goggles) and face protection (full length face shield). Lab coat. Dust respirator. Be sure to use a MSHA/NIOSH approved respirator or equivalent. Wear protective gloves (nitrile).
Emergency procedures:	Prevent dust cloud. In case of a spill and/or a leak, always shut off any sources of ignition, ventilate the area, and excercise caution. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Warn personnel to move away. Prevent entry into sewers, basements or confined areas; dike if needed.

Methods and materials for containment and cleaning up:

ELIMINATE all ignition sources (no smoking, flares, sparks, or flames in immediate area). Stop leak if without risk. Ventilate the area. Absorb with an inert material and put the spilled material in an appropriate waste disposal container. Use clean non-sparking tools to collect absorbed material. Environmental precautions: Prevent further leakage or spillage if safe to do so. Water runoff can cause environmental damage. Prevent entry into sewers, basements or confined

areas; dike if needed.

Precautions for safe handling:	Avoid inhalation of vapor or mist. Avoid contact with skin and eyes. Good general ventilation should be sufficient to control airborne levels. Keep container dry. Handle and open container with care. Wear suitable protective clothing, gloves and eve/face protection. When using do not eat, drink, or smoke. Keep
	away from sources of ignition.
Conditions for safe storage:	Keep only in the original container in a cool well-ventilated place. Keep away from incompatibles. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Avoid prolonged storage periods.
Storage incompatibilities:	Store away from oxidizing agents

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure limits: No data available

Appropriate engineering controls:

Good general ventilation should be sufficient to control airborne levels. Ventilation is normally required when handling or using this product. Eyewash fountains should be provided in areas where there is any possibility that workers could be exposed to the substance. Follow safe industrial engineering/laboratory practices when handling any chemical.

Personal protective equipment	
Respiratory protection:	Dust respirator. Be sure to use a MSHA/N

Hand protection: Eye protection: Skin and body protection:

Dust respirator. Be sure to use a MSHA/NIOSH approved respirator or equivalent. Nitrile gloves. Safety glasses. Lab coat.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state (20°C): Form: Color: Odor: Odor threshold:	Solid Crystal - Powder White - Very pale yellow No data available No data available		
Melting point/freezing point: Boiling point/range: Decomposition temperature: Relative density: Kinematic Viscosity:	92°C (198°F) 267°C (513°F) No data available No data available No data available	pH: Vapor pressure: Vapor density: Dynamic Viscosity:	No data available No data available No data available No data available
Partition coefficient: n-octanol/water (log Pow)	No data available	Evaporation rate: (Butyl Acetate = 1)	No data available
Flash point: Flammability (solid, gas):	No data available No data available	Autoignition temperature: Flammability or explosive limi Lower: No data a Upper: No data a	available

Solubility(ies):

Soluble: Methanol

10. STABILITY AND REACTIVITY

Reactivity: Chemical Stability: Possibility of Hazardous Reactions: Conditions to avoid: Incompatible materials: Hazardous Decomposition Products: Not Available. Stable under recommended storage conditions. (See Section 7) No hazardous reactivity has been reported. Avoid excessive heat and light. Strong oxidizing agents No data available

15. REGULATORY INFORMATION

Toxic Substance Control Act (TSCA 8b.):

This product is NOT on the EPA Toxic Substances Control Act (TSCA) inventory. The following notices are required by 40 CFR 720.36 (C) for those products not on the inventory list:

(i) These products are supplied solely for use in research and development by or under the supervision of a technically qualified individual as defined in 40 CFR 720.0 et sec.

(ii) The health risks of these products have not been fully determined. Any information that is or becomes available will be supplied on a SDS sheet.

16. OTHER INFORMATION

Revision date: 10/06/2014

Revision number: 2

TCI chemicals are for research purposes only and are NOT intended for use as drugs, food additives, households, or pesticides. The information herein is believed to be correct, but does not claim to be all inclusive and should be used only as a guide. Neither the above named supplier nor any of its affiliates or subsidiaries assumes any liability whatsoever for the accuracy or completeness of the information contained herein. Final determination of suitability of any material is the sole responsibility of the user. All chemical reagents must be handled with the recognition that their chemical, physiological, toxicological, and hazardous properties have not been fully investigated or determined. All chemical reagents should be handled only by individuals who are familiar with their potential hazards and who have been fully trained in proper safety, laboratory, and chemical handling procedures. Although certain hazards are described herein, we can not guarantee that these are the only hazards which exist. Our SDS are based only on data available at the time of shipping and are subject to change without notice as new information is obtained. Avoid long storage periods since the product is subject to degradation with age and may become more dangerous or hazardous. It is the responsibility of the user to request updated SDS for products that are stored for extended periods. Disposal of unused product must be undertaken by qualified personnel who are knowledgeable in all applicable regulations and follow all pertinent safety precautions including the use of appropriate protective equipment (e.g. protective goggles, protective clothing, breathing equipment, face mask, fume hood). For proper handling and disposal, always comply with federal, state and local regulations.
